

Non-parametric Tests 1 MS

Q1.

1(a)	When the population cannot be assumed to be normally distributed	1	B1																											
1(b)	H_0 : population median is 6.00, H_1 : population median is greater than 6.00	1	B1	Both hypotheses stated																										
	Calculate deviations and resulting signed ranks	1	M1																											
	<table border="1" style="width: 100%; text-align: center;"> <tr> <td>Devs</td> <td>-0.38</td> <td>-0.27</td> <td>0.55</td> <td>0.81</td> <td>0.10</td> <td>-0.25</td> <td>-0.13</td> <td>0.47</td> <td>-0.14</td> <td>0.26</td> <td>0.99</td> <td>-0.09</td> </tr> <tr> <td>Rank</td> <td>-8</td> <td>-7</td> <td>10</td> <td>11</td> <td>2</td> <td>-5</td> <td>-3</td> <td>9</td> <td>-4</td> <td>6</td> <td>12</td> <td>-1</td> </tr> </table>	Devs	-0.38	-0.27	0.55	0.81	0.10	-0.25	-0.13	0.47	-0.14	0.26	0.99	-0.09	Rank	-8	-7	10	11	2	-5	-3	9	-4	6	12	-1	1	A1	
	Devs	-0.38	-0.27	0.55	0.81	0.10	-0.25	-0.13	0.47	-0.14	0.26	0.99	-0.09																	
	Rank	-8	-7	10	11	2	-5	-3	9	-4	6	12	-1																	
	Test statistic $T = 8 + 7 + 5 + 3 + 4 + 1 = 28$	1	A1																											
	Compare with correct critical value 17	1	M1																											
Conclusion: accept H_0 ; insufficient evidence that the median is greater than 6.00	1	A1FT	Conclusion to be stated in context, not just 'not significant'; follow through their value of T																											
		6																												

Q2.

2(a)	H_0 : population median is 6.40, H_1 : population median \neq 6.40	B1																				
	Calculate differences and signed ranks	M1A1																				
	<table border="1" style="width: 100%; text-align: center;"> <tr> <td>0.04</td> <td>-0.24</td> <td>-0.78</td> <td>-0.58</td> <td>0.11</td> <td>0.22</td> <td>-0.21</td> <td>0.02</td> <td>-0.06</td> <td>-0.12</td> </tr> <tr> <td>2</td> <td>-8</td> <td>-10</td> <td>-9</td> <td>4</td> <td>7</td> <td>-6</td> <td>1</td> <td>-3</td> <td>-5</td> </tr> </table>	0.04	-0.24	-0.78	-0.58	0.11	0.22	-0.21	0.02	-0.06	-0.12	2	-8	-10	-9	4	7	-6	1	-3	-5	
	0.04	-0.24	-0.78	-0.58	0.11	0.22	-0.21	0.02	-0.06	-0.12												
	2	-8	-10	-9	4	7	-6	1	-3	-5												
	Test statistic = $4 + 7 + 2 + 1 = 14$	A1																				
Compare with correct critical value 8	M1																					
Accept H_0 : insufficient evidence to reject claim (FT their test statistic)	A1 FT																					
	6																					
2(b)	Symmetrically distributed about the median	B1																				
		1																				

Q3.

6(a)	Difference of location test for populations not known to be normal	B1																																																
		1																																																
6(b)	<table border="1" style="width: 100%; text-align: center;"> <tr> <td>10.6</td> <td>2</td> <td>10.5</td> <td>1</td> </tr> <tr> <td>11.1</td> <td>7</td> <td>10.7</td> <td>3</td> </tr> <tr> <td>11.8</td> <td>12</td> <td>10.8</td> <td>4</td> </tr> <tr> <td>12.0</td> <td>14</td> <td>10.9</td> <td>5</td> </tr> <tr> <td>12.1</td> <td>15</td> <td>11.0</td> <td>6</td> </tr> <tr> <td>12.2</td> <td>16</td> <td>11.2</td> <td>8</td> </tr> <tr> <td>12.3</td> <td>17</td> <td>11.3</td> <td>9</td> </tr> <tr> <td>12.4</td> <td>18</td> <td>11.6</td> <td>10</td> </tr> <tr> <td>13.2</td> <td>21</td> <td>11.7</td> <td>11</td> </tr> <tr> <td>13.5</td> <td>22</td> <td>11.9</td> <td>13</td> </tr> <tr> <td>13.8</td> <td>23</td> <td>12.5</td> <td>19</td> </tr> <tr> <td>13.9</td> <td>24</td> <td>12.6</td> <td>20</td> </tr> </table>	10.6	2	10.5	1	11.1	7	10.7	3	11.8	12	10.8	4	12.0	14	10.9	5	12.1	15	11.0	6	12.2	16	11.2	8	12.3	17	11.3	9	12.4	18	11.6	10	13.2	21	11.7	11	13.5	22	11.9	13	13.8	23	12.5	19	13.9	24	12.6	20	M1
	10.6	2	10.5	1																																														
	11.1	7	10.7	3																																														
	11.8	12	10.8	4																																														
	12.0	14	10.9	5																																														
	12.1	15	11.0	6																																														
12.2	16	11.2	8																																															
12.3	17	11.3	9																																															
12.4	18	11.6	10																																															
13.2	21	11.7	11																																															
13.5	22	11.9	13																																															
13.8	23	12.5	19																																															
13.9	24	12.6	20																																															
	Total ranks: 109 or 191	A1																																																
	$H_0: m_x = m_y$, $H_1: m_x > m_y$	B1																																																
	Use normal approximation with attempts at mean and variance	M1																																																
	mean = 150, variance = 300	A1																																																

Non-parametric Tests 1 MS

Q4.

2(a)	$H_0: m = 200$ $H_1: m < 200$	B1	Allow 'median' in words, allow m not defined
	10 -14 -12 8 -16 -9 15 -2 -4	M1	Signed differences (at most 3 errors)
	Ranks: 5 -7 -6 3 -9 -4 8 -1 -2	A1	Award for correct rank order, ignore signs
	Sum ranks $T = 16$	A1	CWO
	Critical value 8 and compare ' 16 ' > 8	M1	Compare their T with 8
	Accept H_0 Insufficient evidence to support scientist's belief	A1	In context, all correct, except possibly hypotheses. Level of uncertainty in language used. No contradictions
		6	
2(b)	Magnitude of differences from median are taken into account	B1	Must mention magnitude and differences
		1	

Q5.

2(a)	H_0 : difference in (population) medians = 0 H_1 : difference in (population) medians < 0 (or > 0)	B1 B1	Correct hypotheses (median or m) All notation identified e.g. m = population median if used
	Differences: -3 4 5 -1 -8 -19 -11 10 -13 -7 9 -16	M1	At most 3 errors
	Ranks: -2 3 4 -1 -6 -12 -9 8 -10 -5 7 -11	A1	Award for correct rank order, ignore signs
	Sum $T = 3 + 4 + 8 + 7 = 22$	A1	cwo
	Compare with critical value 17: ' 22 ' > 17	M1	Compare <i>their</i> T with 17
	Accept H_0 Data does not support student's claim	A1	In context, all correct, except possibly second B1 Level of uncertainty in language used. No contradictions.
		7	
2(b)	Rank for A becomes +2,	M1	$T = 24$
	Changing sign of difference can only reduce evidence in favour of the claim.	A1	still > 17 and test result unchanged
		2
